

Positions

About the words

Prepositions are a funny bunch of words. The prepositions in this set of words are all intended to show locations. As such there can be a bit of overlap. For example behind and in front of can be used interchangeably in this set as the bike is in front of the man and the man is behind the bike.

Who is this sheet for?

This is a fairly basic set of images intended for beginners. At the point where students start using words like over and above they'll also start running into the obviously more complicated situation of what's the difference between them and those students aren't likely to need this particular set of images. There are other words I could add here though so if you are interested in seeing more you know what to do; just get in touch.

Using the worksheet

There are countless ways to use cards in classes. Games of memory, matching games, and games where kids run to the card or throw the card into a hat for a point. As long as you are active and fun and the kids are enjoying themselves you're going to have a great time and they are too. Make sure you and your students say the words again and again and speak, make sentences so everyone can hear and say the sentences in context.

Note: Kids have a way of destroying cards they get hold of, so after printing the cards you might want to laminate them and remember to round off the edges so no one gets a sharp card in the eye. If you do it well enough this opens up the usage of the cards for a few good games where you can flick or flip the cards to be more active.
