

Lines

About the words

Be careful with these images. They can easily enlighten or confuse. The cards for parallel lines, straight lines and horizontal lines are all basically the same. And diagonal lines are straight. So are the parallel lines shown. But parallel lines can be curved lines too if you put a circle inside another. My point is, introduce the lines that are important for your students. If they are little kids, straight, wavy, curly, and squiggly might be the best. For older kids you can start to introduce the other words.

Who is this sheet for?

These images are for kids or young adults who may need the vocabulary for whatever reason.

Using the worksheet

There are countless ways to use cards in classes. Games of memory, matching games, and games where kids run to the card or throw the card into a hat for a point. As long as you are active and fun and the kids are enjoying themselves you're going to have a great time and they are too. Make sure you and your students say the words again and again and speak, make sentences so everyone can hear and say the sentences in context.

Note: Kids have a way of destroying cards they get hold of, so after printing the cards you might want to laminate them and remember to round off the edges so no one gets a sharp card in the eye. If you do it well enough this opens up the usage of the cards for a few good games where you can flick or flip the cards to be more active.
