Find Out About: Sports
This is a variation of the classic "find out about" activity where you get students in a group to find out something about other people. Find out they birthdays, favorite foods, and hometowns of three people in your group or class. It's sort of an old standard.

How to use the worksheet.
1. Drill the questions and answers with one of the students as a volunteer.
    TR: Where are you from?
    CLASS: Where are you from?
    ST: I'm from.
2. Drill it again with he/she
3. Split the class up into four groups: Jordan, Koji, Kournikoa, Schwarzenegger. Each group gets their corresponding worksheet. For example, the Jordan group gets the page with Jordan's information. Only the last sheet has all the information, that is for the teacher.
4. Students circulate the room asking questions to find out about the other sports stars. They can not look at one another's sheets and have to talk to someone from each of the other groups to complete the task.
5. When done, check the students' answers.
6. Now ask, who is your favorite sport star? (Not someone on the sheet we hope.) Students break into pairs or groups and talk about their favorite sports stars.

Note:
- This activity requires careful modeling, time management and clear introduction. In the conversation at the end it's important for students to be producing the language they just practiced without mistakes. Otherwise they haven't learned. To ensure that you need to give them correction, monitor what they are doing and help them where they need it.
